

# Professional Childcare Center and Preschool Management Software

**Affordable  
Easy To Use  
Comprehensive  
Flexible  
Complete Package**

**Childcare Sage™** is the most affordable, flexible, and professional center management software available. Childcare Sage™ easily automates most of the tasks required to run any childcare center or preschool.

### To help with record keeping:

It will store child, parent, and pickup person information plus photos, rates, schedules, immunizations and medical histories, comments, daily logs, and allergies. It will also store staff information, photos, payroll rates, schedules, and certifications.

### To help with billing and payroll:

It will automatically keep track of childcare charges and staff wages, and will print childcare bills and staff paysheets.

### To help with bookkeeping:

It can run accounting reports to show which children owe a bill, which staff haven't been paid, and what the center income is. Plus it integrates with Quickbooks Pro™ to create a comprehensive childcare accounting system.

### To help with attendance tracking:

It includes a flexible Timeclock program that lets parents and staff sign themselves in/out.

### To help with menu planning:

It includes a graphical menu planner, production reports, and it automatically keeps track of which meals each child ate for CACFP reimbursement.

### To help stay in touch with parents:

It includes an appointment scheduler, it can automatically email bills and receipts, and it can create form letters through Microsoft Word™.

### To help you register children:

It includes printable daycare forms such as registration, medical history, policies and others. Plus it includes an electronic registration form that parents can fill in, and that automatically loads in to the Childcare Sage™.

**Plus much, much, more!**

**We have included charts comparing Childcare Sage to the competition on the back of this brochure.**

Childcare Sage™ is such a great value because we don't have modules that can double or triple the price of the software. Our software comes with every feature you need out of the box, all at a great price.

We believe that smaller centers shouldn't have to pay large center software prices to get good software. That is why we offer the Childcare Sage™ in 4 versions;

- 1) **Family Center:** limited to 20 active children and 8 staff,
- 2) **Small Center:** limited to 40 active children and 16 staff,
- 3) **Medium Center:** limited to 80 active children and 32 staff,
- 4) **Large Center:** unlimited for children and staff.

There are **no other differences** between the versions.

Childcare Sage™ runs on Microsoft Windows based machines. Any computer from the last five years can run our program, and we include all required software.

In case you have any questions about how to use our software, we offer toll free phone support and email support. We also give you complete access to our user forums where you can find answers to most of your questions. The Childcare Sage also comes with full manuals, user guides, and video tutorials that explain and show how to use our program.

If you have any other questions about our software, please call us or visit our website. We have an extensive user questions area where we have answered many pre-sale questions about our software.

When you are ready to purchase our software, you can go to our website and purchase online or call us toll-free to place your order. We always send you a Childcare Sage CD in the mail, and we also give you full immediate access to our website download area.
